5. Services Offered

The Portfolio Manager is presently offering the following Investment Approaches

5.1. Investment Approach: Flexicap Portfolio

5.1.1. **Fund Manager:** Manish Gupta

5.1.2. **Investment objective:** To generate sustainable returns over medium to long term by making investments which primarily comprise of equity securities.

5.1.3. **Description of types of securities:** Client monies would primarily be invested in equity shares and equity linked instruments issued by companies which are listed in India. Some part of client monies might be invested in units of liquid funds or money market funds and some part might be retained as bank balance in bank account.

5.1.4. **Basis of selection of such types of securities:** This investment approach is based on generating returns by investing in participating instruments of companies where we have confidence in the quality of the management, and we expect a 15-25% CAGR growth in the underlying business over the next 3-5 years. Various quantitative parameters like revenue growth, free cash flow generation, return on capital employed etc will be considered to select the actual investments. Under this investment approach, investments are primarily made in equity shares and equity linked instruments issued by companies listed in India. To keep some part of client monies in liquid form, such monies are either invested in units of money market funds or liquid fund or they are retained in the bank account in the form of bank balance.

5.1.5. **Allocation of portfolio across types of securities:**

Type of security	Allocation in portfolio
Equity and equity linked instruments	>= 70%
Money market funds/ Liquid Funds/ Bank balance	Up to 30%

5.1.6. **Strategy:** Equity

5.1.7. **Appropriate benchmark to compare performance:** S&P BSE 500 Total Return Index

5.1.8. **Basis for choice of benchmark:** Since this investment approach will be investing in large-cap, mid-cap and small-cap companies, it is prudent to benchmark the performance to an index that has representation from all the 3 categories. Hence S&P BSE 500 TRI Index has been selected as the benchmark for comparing performance.

5.1.9. **Minimum investment:** The minimum investment amount will be as stipulated by the Regulations from time to time.

5.1.10. **Indicative tenure or investment horizon:** 3-5 years

5.1.11. **Lock-in Period:** Nil

5.1.12. **Exit load:** Exit load on withdrawal of monies/securities shall be agreed upon with each client and specified in more detail in the Agreement.

- 5.1.13. **Redemption/Partial withdrawals:** Partial withdrawal shall be allowed only to such extent that portfolio value after recovery of fees, charges and payment of withdrawal amount is not less than the amount stipulated by the Regulations from time to time.
- 5.1.14. **Use of derivatives:** The Portfolio Manager might transact in derivatives in case it deems it necessary to protect the value of client's portfolios in periods of market instability. If the client does not want the Portfolio Manager to use derivatives at all in his/her portfolio, then the client can mention Derivatives as negative security in the Agreement and the Portfolio Manager will be barred from using derivatives in the client's portfolio.
- 5.1.15. **Risks associated with the investment approach:** Please refer the 'Clause 6 - Risk Factors' below.

- 5.6.3. **Description of types of securities:** Under this investment approach, client monies would primarily be invested in direct plans of mutual funds, ETFs (exchange traded funds) and investment trusts. Some part of client monies might be retained as bank balance in bank account.
- 5.6.4. **Basis of selection of such types of securities:** This investment approach is based on generating returns by constructing a balanced portfolio that has a mix of growth and income generating investments. The choice of investments from growth-perspective will be such where the Portfolio Manager has expectation of growth of 15-20% CAGR and the choice of investments from income-perspective will be such where the Portfolio Manager expects a yield of 6-12% per annum. Hence, the investments will be in direct plans of mutual funds, ETFs (exchange traded funds) and investment trusts. Some part of client monies might be retained as bank balance in bank account.
- 5.6.5. **Allocation of portfolio across types of securities:**

Type of security	Allocation in portfolio
Direct Plan of Mutual Funds, Exchange Trade Funds (ETFs) and Investment Trusts	>=70%
Bank balance	Up to 30%

- 5.6.6. **Strategy:** Multi-Asset
- 5.6.7. **Appropriate benchmark to compare performance:** NSE Multi-Asset Index 1
- 5.6.8. **Basis for choice of benchmark:** Since the investment approach will be investing in multiple asset classes, it is prudent to benchmark the performance to an index that has representation from multiple asset classes. Hence NSE Multi-Asset Index 1 has been selected as the benchmark for comparing performance.
- 5.6.9. **Minimum investment:** The minimum investment amount will be as stipulated by the Regulations from time to time.
- 5.6.10. **Indicative tenure or investment horizon:** 3-5 years
- 5.6.11. **Lock-in Period:** Nil

- 5.6.12. **Exit load:** Exit load on withdrawal of monies/securities shall be agreed upon with each client and specified in more detail in the Agreement.
- 5.6.13. **Redemption/Partial withdrawals:** Partial withdrawal shall be allowed only to such extent that portfolio value after recovery of fees, charges and payment of withdrawal amount is not less than the amount stipulated by the Regulations from time to time.
- 5.6.14. **Use of derivatives:** The Portfolio Manager might transact in derivatives in case it deems it necessary to protect the value of client's portfolios in periods of market instability. If the client does not want the Portfolio Manager to use derivatives at all in his/her portfolio, then the client can mention Derivatives as negative security in the Agreement and the Portfolio Manager will be barred from using derivatives in the client's portfolio.
- 5.6.15. **Risks associated with the investment approach:** Please refer the 'Clause 6 - Risk Factors' below.

Policies for investments in associates/group companies of the portfolio manager and the maximum percentage of such investments therein subject to the applicable laws/regulations/guidelines.

The Portfolio Manager would currently not be making investments in associates/group companies and would disclose the same in this Document, in case it decides to make investments in future.

6. Risk factors

6.1. General Risk:

- 6.1.1. Securities investments are subject to market risk and there is no assurance or guarantee that the objectives of the PMS will be achieved.
- 6.1.2. The Portfolio Manager has no prior experience/track record in the field of portfolio management services and has obtained a license to function as a portfolio manager only on 14-March-2023.
- 6.1.3. Without prejudice to the above, the past performance of the Portfolio Manager does not indicate its future performance.
- 6.1.4. Any act, omission or commission of the Portfolio Manager under the Agreement would be solely at the risk of the Client and the Portfolio Manager will not be liable for any act, omission or commission or failure to act save and except in cases of gross negligence, willful default and/or fraud of the Portfolio Manager.
- 6.1.5. The performance of the Client Portfolio may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems in equity and debt markets.
- 6.1.6. The Portfolio Management Service is subject to risk arising out of non-diversification as the Portfolio Manager under its PMS may invest in a particular sector, industry, few/single Portfolio Entity/ies. The performance of the Client Portfolio would depend on the performance of such companies/industries/sectors of the economy.

6.2. Risks associated with investments in equity and equity linked securities:

- 6.2.1. Listed equity and equity related securities by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.
- 6.2.2. In domestic markets, there may be risks associated with trading volumes, settlement periods and transfer procedures that may restrict liquidity of investments in equity and equity related securities.

- 6.2.3. In the event of inordinately low volumes, there may be delays with respect to unwinding the Portfolio and transferring the redemption proceeds.
- 6.2.4. The value of the Portfolio may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the Portfolio valuation may fluctuate and can go up or down.
- 6.2.5. Investors may note that Portfolio Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.

6.3. Risks associated with investments in derivatives:

- 6.3.1. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Portfolio Manager to identify such opportunities. Identification and execution of such strategies to be persuaded by the Portfolio Manager involve uncertainty and decision of the Portfolio Manager may not always be profitable. No assurance can be given that the Portfolio Manager shall be able to identify or execute such strategies.
- 6.3.2. The risks associated with the use of derivatives are different from or possibly greater than the risk associated with investing directly in securities and other traditional investments.
- 6.3.3. As and when the Portfolio Manager on behalf of Clients would trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that loss may be sustained by the Portfolio as a result of the failure of another party (usually referred as the “counter party”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value.
- 6.3.4. The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned.
- 6.3.5. The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price.
- 6.3.6. Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.

6.4. Risks associated with investments in fixed income securities/products:

- 6.4.1. Some of the common risks associated with investments in fixed income and money market Securities are mentioned below. These risks include but are not restricted to:
- 6.4.2. Interest Rate Risk: As with all debt securities, changes in interest rates affects the valuation of the portfolios, as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of longer-term securities generally fluctuate more in response to interest rate changes than do shorter-term securities. Interest rate movements in the Indian debt markets can be volatile leading to the possibility of large price movements up or down in debt and money market securities and thereby to possibly large movements in the valuation of portfolios.
- 6.4.3. Liquidity or Marketability Risk: This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is a characteristic of the Indian fixed income market.
- 6.4.4. Credit Risk: Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. risk that the issuer will be unable to make timely principal and interest payments on the security). Because of this risk, debentures are sold at a yield spread above those offered on treasury securities, which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.
- 6.4.5. Reinvestment Risk: Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- 6.4.6. Rating risks: Different types of debt securities in which the Client invests, may carry different levels and types of risk. Accordingly, the risk may increase or decrease depending upon its investment pattern, for instance corporate bonds carry a higher amount of risk than government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively riskier than bonds, which are AAA rated.
- 6.4.7. Price volatility risk: Debt securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer, among others (market risk). The market for these Securities may be less liquid than that for other higher rated or more widely followed Securities.
- 6.4.8. Identification of Appropriate Investments: The success of the PMS as a whole depends on the identification and availability of suitable investment opportunities and terms. The availability and terms of investment opportunities will be subject to market conditions, prevailing regulatory conditions in India where the Portfolio Manager may invest, and other factors outside the control of the Portfolio Manager. Therefore, there can be no assurance that appropriate investments will be available to, or identified or selected by, the Portfolio Manager.

6.5. Management and Operational risks:

- 6.5.1. Reliance on the Portfolio Manager
 - 6.5.1.1. The success of the PMS will depend to a large extent upon the ability of the Portfolio Manager to source, select, complete and realize appropriate

investments and also reviewing the appropriate investment proposals. The Portfolio Manager shall have considerable latitude in its choice of Portfolio Entities and the structuring of investments. Furthermore, the team members of the Portfolio Manager may change from time to time.

- 6.5.1.2. The investment decisions made by the Portfolio Manager may not always be profitable.
- 6.5.1.3. Investments made by the Portfolio Manager are subject to risks arising from the investment objectives, investment strategy and asset allocation.
- 6.5.2. Inter-se different activities: The Portfolio Manager may involve itself in a variety of advisory, management and investment-related activities including management of alternative investment funds and intend to continue to do so in the future. The Portfolio Manager and any of its affiliate/group entities may, from time to time, act as investment managers or advisers to entities, companies or funds apart from the portfolio management activities under the PMS. It is therefore possible that the Portfolio Manager and its affiliates may in the course of their business have potential conflicts of interest inter-se different activities.
- 6.5.3. Exit Load: Client may have to pay a high exit load to withdraw the funds/Portfolio (as stipulated in the Agreement with the Client) for termination of the Agreement within specific time periods. In addition, they may be restricted / prohibited from transferring any of the interests, rights or obligations with regard to the Portfolio except as may be provided in the Agreement and in the Regulations.
- 6.5.4. Non-diversification risks: This risk arises when the Portfolio is not sufficiently diversified by investing in a wide variety of instruments, However, the Portfolio Manager will attempt to maintain a diversified portfolio in order to minimize this risk.
- 6.5.5. No Guarantee: Investments in Securities are subject to market risks and Portfolio Manager does not in any manner whatsoever assure or guarantee that the objectives will be achieved. Further, the value of the Portfolio may increase or decrease depending upon various market forces and factors affecting the capital markets such as de-listing of Securities, market closure, relatively small number of scrips accounting for large proportion of trading volume. Consequently, the Portfolio Manager provides no assurance of any guaranteed returns on the Portfolio.

6.6. India-related Risks

- 6.6.1. Political, economic and social risks: Political instability or changes in the government could adversely affect economic conditions in India generally and the Portfolio Manager's business in particular. The Portfolio Entity's business may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms. Nevertheless, the government has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Moreover, there can be no assurance that such policies will be continued and a change in the government's economic liberalization and deregulation policies in the future could affect business and economic conditions in India and could also adversely affect the Portfolio Manager's financial condition and operations. Future actions of the Indian central government or the respective Indian state governments could have a significant effect on the Indian economy, which could adversely affect private sector companies, market conditions, prices and yields of the Portfolio Entity/ies.

6.6.2. **Inflation Risk:** Inflation and rapid fluctuations in inflation rates have had, and may have, negative effects on the economies and securities markets of the Indian economy. International crude oil prices and interest rates will have an important influence on whether economic growth targets in India will be met. Any sharp increases in interest rates and commodity prices, such as crude oil prices, could reactivate inflationary pressures on the local economy and negatively affect the medium-term economic outlook of India.

6.7. Legal and Tax risks:

6.7.1. **Tax risks:** Changes in state and central taxes and other levies in India may have an adverse effect on the cost of operating activities of the Portfolio Entities. The government of India, state governments and other local authorities in India impose various taxes, duties and other levies that could affect the performance of the Portfolio Entities. An increase in these taxes, duties or levies, or the imposition of new taxes, duties or levies in the future may have a material adverse effect on the Client Portfolio's profitability. Furthermore, the tax laws in relation to the Client Portfolio are subject to change, and tax liabilities could be incurred by Client as a result of such changes.

6.7.2. **Change in Regulation:** Any change in the Regulations and/or other Applicable Law/s or any new direction of SEBI may adversely impact the operation of the PMS.

6.8. Risks pertaining to Investments in Securities/Instruments:

6.8.1. The Client Portfolio may comprise of investment in fixed income Securities, debt Securities/products and in case of such Securities, the Portfolio Manager's ability to protect the investment or seek returns or, liquidity may be limited.

6.8.2. The Client Portfolio may be invested in listed securities and as such may be subject to the market risk associated with the vagaries of the capital market.

6.8.3. The Portfolio Manager may also invest in Portfolio Entity/ies which are newly listed on stock market. Such investments may present greater opportunities for growth but also carry a greater risk than is usually associated with investments in listed equity shares of established companies, which often have a historical record of performance.

6.8.4. In case of investments in mutual fund, The Client shall bear recurring expenses of the Portfolio Manager in addition to the expenses of the underlying mutual fund schemes. Hence, the Client may receive lower pre-tax returns compared to what the Client may have received had he invested directly in the underlying Securities of the mutual fund schemes.

The portfolio manager has a bottom-up fundamentals-oriented approach towards investment. For managing diversification risk and to reduce the exposure of massive drawdown of a single stock, the number of scrips in each portfolio vary from 15-40 stocks per portfolio.

The portfolio manager does not have a sector-based diversification approach. It is possible that the portfolio may have 100% allocation in as few as two or three sectors.

17. General Provisions

The Prevention of Money Laundering Act, 2002 (PMLA Act) came into force with effect from July 1, 2005, forming the core of the legal framework to combat money laundering. As per the provisions of the PMLA Act, Intermediaries, including portfolio managers, have certain obligations regarding verification of the identity of their clients, maintaining records and furnishing information to the Financial Intelligence Unit—India (FIU-IND). SEBI vide its various circulars issued has directed all Intermediaries, including portfolio managers to formulate and implement policies and procedures for dealing with money laundering and adoption of 'Know Your Customer' (KYC) Policy. The client should ensure that the amount invested in the Portfolio Management Service is through legitimate sources only and does not involve and is not designed for the purpose of any contravention or evasion of any Act, Rules, Regulations, Notifications or Directions of the provisions of the PMLA Act, the Prevention of Money Laundering Rules, 2005, Income Tax Act, Anti Money Laundering Guidelines, Prevention of Corruption Act, Act or any other applicable laws enacted by the Government of India from time to time.

The Portfolio Manager reserves the right to take all steps and actions, including recording clients telephonic calls and/or obtaining and retaining all documentation for establishing the identity of the client, proof of residence, source of funds etc. in accordance applicable law from the client and/or the custodian as may be required to ensure appropriate identification/verification and re-verification of the Client, the course of fund etc. under its KYC policy as may be amended and updated from time to time. If at any time the Portfolio Manager believes that the transaction is suspicious in nature in accordance with applicable law, the Portfolio Manager shall have the absolute discretion to report the transaction to FIU-IND and/or any other statutory body that the Portfolio Manager is bound to report to from time to time. The Portfolio manager can also reject any application, freeze the account, compulsorily close the Client account and pay out the proceeds to the Client, at its option. The Portfolio Manager shall have no obligation to inform the Client or its agent/power of attorney holder in the event of such reporting.

The Portfolio Manager and its directors, employers, officers, agents and persons acting on its behalf shall not be responsible/liable for any loss suffered by the Client in any manner whatsoever due to any reporting to the FIU-IND by the Portfolio Manager, the rejection of any application or freezing or compulsory closure of any Client account or termination of the Agreement due to any non-compliance by the Client with the provisions of any applicable law, rule, regulation, KYC policy and/or where the Portfolio Manager has reported a suspicious transaction to FIU-IND.

The Portfolio Manager and the Client can mutually agree to be bound by specific terms through a written two-way agreement between themselves in addition to the standard agreement for Portfolio Management Services.
